This host can obtain an IPv4 address and other networking parameters automatically if your network includes a DHCP server. If not, ask your network administrator for the appropriate settings.
IPv4 Configuration
This host can obtain network settings automatically if your network includes a DHCP server. If it does not, the following settings must be specified:
( ) Disable IPv4 configuration for management network
( ) Use dynamic IPv4 address and network configuration
(o) Set static IPv4 address and network configuration:
IPv4 Address [109.203.103.124]
Subnet Mask [255.255.255.0]
Default Gateway [109.203.103.1]

Reset System Configuration
Restart Management Network
Restarting the management network interface may be required to restore networking or to renew a DHCP lease.
Restarting the management network will result in a brief network outage that may temporarily affect running virtual machines.
Note: If a renewed DHCP lease results in a new network identity (e.g., IP address or hostname), remote management software will be disconnected.
